

Open Static Map API

Provides:

images of a map of some region

Key Provisioning:

Pain factor (*0=ezipz...5=nightmare*): 

- need to create an account to get an api key

Quotas:

- 15000 per month

The Good:

- doesn't return a json dictionary but just an image, so can use url for api request as src tag in img
- can search by the name of a location or by latitude and longitude
- various different styles of map, such as satellite image or just simple stylized map

The Bad:

- cannot take out some location descriptions in map

The Ugly:

- map images have a watermark
